## PROFESSIONAL SUMMARY

A motivated Accounting and Computer Science double major with a strong academic record and a passion for leveraging technology to solve complex business problems. Seeking a Winter 2026 Tax Consultant Internship to apply analytical skills and technical expertise in data analysis and process improvement to deliver actionable solutions for clients.

## EDUCATION

**University of Lynchburg,** Lynchburg, Virginia — Expected Graduation: December 2027
**Bachelor of Science, Double Major:** Accounting and Computer Science, Minor in Mathematics — **CGPA: 3.86**
**Relevant Coursework:** Intermediate Accounting, Perspective of Business, Micro-Economics, Linear Algebra, Calculus I-III
**Upcoming Coursework (Spring 2026):** Intermediate Accounting II, Personal Income Tax, Business Statistics, Operating Systems & Computer Organization, Principles of Management, Marketing
**CPA Eligibility:** On track to meet educational requirements for CPA licensure.

## TECHNICAL & ACCOUNTING SKILLS

- **Accounting & Analysis:** Financial Statement & Cash Flow Analysis, GAAP Reporting (Leases, Pensions, Investments), General Ledger & Month-End Close, Accounting for Income Taxes, Bank Reconciliation, Inventory & Fixed Asset Accounting
- **Programming & Database:** Java, Python, SQL, C++, MySQL, MongoDB
- **Technologies & Tools:** AWS (S3, EC2), Apache Spark, Hadoop, Spring Boot, Git, GitHub, Jira, Agile Methodologies, REST APIs, Linux

## PROJECT EXPERIENCES

**IMDBSpark Data Analysis** GitHub | *Java, AWS, Apache Spark, Hadoop, AWS S3, AWS EC2, YARN* — *November 2024*

- Engineered a distributed data pipeline using Apache Spark on AWS to analyze a 7 GB dataset with over 3 million records, demonstrating the ability to process and derive insights from large-scale informational, a skill directly transferable to complex financial data analysis.
- Optimized cluster performance, reducing job execution time by 25%, showcasing an ability to improve efficiency in data-intensive tasks.

**UL Chess Club Project Manager** Azure | *C#, Azure DevOps, Git* — *February 2025*

- Led a 5-person team using Agile methodologies, delivering weekly releases with zero critical bugs and reducing issue resolution time by 20% via improved workflow tracking.

**LeetKeeper Performance Metrics** GitHub | *NodeJS, MongoDB* — *January 2025*

- Created a full-stack application to track and analyze user performance metrics via API integration, providing real-time, data-driven insights to inform learning strategies and encourage consistent engagement.

## WORK EXPERIENCES

**Computer Science Tutor |** University of Lynchburg — *September 2024 – Present*

- Instructed students in foundational C++ programming, focusing on building logical frameworks and a systematic approach to problem-solving for beginner-level code.

**Resident Assistant |** University of Lynchburg — *January 2024 – May 2025*

- Applied established protocols to manage sensitive situations, ensuring compliance with university policies.
- Communicated critical information to a diverse community, fostering an environment of trust and accountability.

**Calculus Tutor** | University of Lynchburg — *January 2024 – May 2025*

- Delivered individualized instruction, deconstructing complex quantitative problems into logical, step-by-step solutions to enable student comprehension.

**Client: Qirat Ventures** | Freelance Developer (Remote, via Upwork) — *Summer 2023*

- Developed a secure, database-driven e-commerce system, collaborating directly with the client to understand business requirements and delivering a tailored solution within budget and timeline.

## LEADERSHIP & ACTIVITIES

**President, Nepali Students' Club** — *August 2024 – August 2025*

- Manage the annual budget and fund allocation, collaborating with university administration on compliance and reporting to increase organizational efficiency.
